A React Developer with 2+ years of experience, who can convert any given design into fully functional reusable components. I have strong fundamentals in HTML, CSS, and Javascript. I have worked on web applications with complex UI and functionalities. I am always ready to upskill myself with new technologies as and when required.

Experience

Frontend Developer (*Full - Time*)

KAOS | Bangalore | Apr 2022 - present

- Working on frontend for a Cloud-based application used for tv program scheduling with customers across different parts of world.
- Developed UI for many interesting features for the application, ensuring its successful implementation and functionality.
- Contributed to the development and maintenance of the design system library, ensuring consistency and efficiency in UI components across the application.
- Added unit tests for existing and new features, which helps in tracking possible bugs during development of new features.
- Fixed various production bugs for existing features which improved the overall reliability and security of the application.

Software Engineer (*Internship*)

Roxiler Systems | Pune | Jan 2022- Apr 2022

- Worked on a social media application for senior citizens, which has different features like creating and reading posts, adding and following friends etc
- Improved the overall performance of the app by fixing some major bugs.
